

Word Search

Pollution in our streams and groundwater can come from many sources (including nonpoint) and not just from big spills. See if you can find the pollutants listed below.

Agriculture

Animals

Cars

Chromium

Copper

Dirt

Driveway

Fertilizer

Garbage

Gasoline

Grass Clippings

Grease

Lead

Motor Oil

Mud

Nitrate

Pesticides

Phosphorous

Salt

Sediment

Sewage

Tar

Trash

Wastewater

Wildlife

Polluted water that goes down the drains in your house goes to a wastewater plant or septic system for treatment.
